

TDI site back online

2014-04-07 11:56:31 by Xenomorph

TDI-HQ.COM is back online!! Finally!

At the begin of March TDI was moved to a new server at a different host. Backups were made from the database, but when setting up the site, it seemed that the backup SQL was corrupt.

While running the latest php version, new errors popped up also, eregi() function in php was deprecated, so I had to rewrite a lot of files to preg_match().

I hope the site works again, if not, then just let me know in the forums.....

Xeno
